Head Female Attendant—MISS CHARLOTTE WILLIAMS.

THE

TWENTIETH ANNUAL REPORT

OF THE

COMMITTEE OF VISITORS

OF THE

Cambridgeshire, Isle of Ely, and Borough of Cambridge

PAUPER LUNATIC ASYLUM.

PURSUANT to the 62nd Section of the 16th and 17th Victoria, Chapter 97, the Committee of Visitors of the above Asylum beg to Report to Her Majesty's Justices of the Peace for the County of Cambridge and Isle of Ely respectively, and to the Town Council of the Borough of Cambridge, as follows:—

Progress of Works for enlarging the Asylum.

On reference to your Committee's 19th Annual Report (page 8) it will be seen that the Works for the Enlargement and Improvement of the Asylum were commenced by the Asylum Staff of Workmen under the superintendence of Mr. Rowe on the 26th of September, 1876. The portions following have now been completed: viz. on the Male side of the Asylum, an Infirmary and General W.C's.

On the Female side an Infirmary, Laundry, Patients' Day Room, Boundary Wall and Gates,

Dormitory, General W.C's., General Bath Room, and a portion of the Corridor connecting it with the Wards and Infirmary.

It will be recollected that in August, 1876, your Committee advertised for Tenders for the building of an Infirmary on the Male Side. The result being unsatisfactory, your Committee determined on carrying out the Work by the Asylum Staff of Workmen with the view of ascertaining whether or not it could be done for the amount estimated as its cost by Mr. Rowe, and they have now pleasure in stating that the Infirmary, instead of costing £2467. 15*s.* 0*d.*, the amount of the lowest Tender, has been built and completed at a cost of £1,113. 16*s.* 4*d.*, being less than Mr. Rowe's original Estimate, viz. £1428. 2*s.* 6*d.*

By your Committee's Special Report of the 22nd May, 1876 (to be found at page 14 of the 19th Annual Report), the cost of the Proposed New Works at the Asylum was estimated at £13,000, and it was stated that the sum of £2,000 would be annually called for from the Three Bodies; your Committee accordingly ordered the payment of one sum of £2,000 on the 26th September, 1876, and a further sum of £2,000 on the 26th February, 1877.

On the 1st of March, 1877, the Commissioners in Lunacy addressed a Letter to your Committee, which contained the following Paragraph:—

"It was with feelings of the greatest surprise and regret that the Board learned that Building operations, so necessary for the improvement of the Sanitary conditions of the Asylum and the comfort of the Patients, are proposed to be protracted over a period of six years."

And after remarking that the delay in commencing the enlargement of the Asylum had been excessive, the Commissioners pressed upon your Committee the great desirability of completing the New Works as soon as possible.

Your Committee in reply forwarded to the Commissioners a copy of their Special Report of the 22nd of May, 1876, and stated that ever since 1870 the Visitors had endeavoured without success to obtain an Agreement between the Commissioners in Lunacy and the Three Bodies to a scheme for enlarging the Asylum, and for that reason, and not from any want of exertion or fault of the Visitors, the work had been so long deferred.

Your Committee also stated that they were of opinion that it would have been unwise to attempt to carry out all the proposed Work simultaneously, as they affect a large portion of the present Building. Such a course must necessarily have involved the removal of a large number of Patients from the Building to other Asylums during the progress of the Works and have caused discomfort to the Patients and their friends, and needless expense to the Ratepayers, and further delay if it failed to meet with Agreement from any one of the Four Bodies, whose

consent it is necessary for your Committee to obtain.

Your Committee further remarked that though the final adoption and grant of the money took place so lately as the 8th August, 1876, the Infirmary on the Male Side had (at the date of the Letter 26th March, 1877) already been built; that by the end of July, 1877, the General Water Closets on the Male and Female sides, the Laundry, Patients' Day Room, the Boundary Wall and Gates, the Dormitory of the Infirmary, and the Infirmary on the Female Side would be finished, and that during the course of the year 1878 additions in front of the Asylum would also be completed, and the Asylum would then be provided with cubical space required for the Patients.

Since this Letter your Committee have not heard from the Commissioners on the subject. The Works promised in 1877 have been carried out, and there is every prospect that the Works proposed by your Committee to be done in 1878 will be done within that period.

Artizans also employed in remedying defects in the Asylum Building.

Besides the New Works in progress in the Asylum, Staff of Artizans have been engaged in remedying numerous defects in the Asylum Building, owing to its original faulty construction, which has caused and is still causing considerable anxiety to your Committee as well as a very extensive outlay as evidenced by the large calls on the County, Isle, and Borough, for repairs to the fabric hereafter mentioned.

Repairs and New Works carried out in the past year.

Amongst the numerous works carried out by your Committee during the past year are the following, viz.: The repair of the large Cast Iron Tank in the Tower (which had been weakened by the gradual action of rust) at a cost of £35. A new valve to the Main Pipe in the Kitchen Yard at a cost of £10. Two new copper inner pans to the two Iron Boilers in the Laundry at a cost of £78. A new Water Closet and apparatus in the Male Ward, No. 1, at a cost of £95. A new Wrought Iron Hot-Water Tank, capable of holding 1000 gallons, with fittings for supply of the Asylum Wards, at a cost of £92. Iron Water Pipes from the Asylum Tanks to the Lodge at a cost of £60. A new Coal-Place for the Laundry at a cost of £12. A Room for the reception of Soiled Linen at a cost of £58. Lead Gutters over the Recreation Room and on the Roof of the Central Building at a cost of £20.

Orders on the County, Isle, and Borough for Landlords Repairs.

Your Committee have, during the past year, issued orders on the County, Isle, and Borough for the amounts, and in the undermentioned proportions for the ordinary Repairs of the Asylum, under the 38th Section of the Lunatic Asylums Act, 1853.

	County 9-19ths.			Isle. 7-19ths.			Borough. 3-19ths.			Total.		
1877.	£.	s.	d.	£.	s.	d.	£.	s.	d.	£.	s.	d.

	1027	13	6	799	6	2	342	11	2	2169	10	10

Cost of Maintenance of Patients in 1877.

Your Committee on their 19th Annual Report (page 10) set out a Resolution passed at their Meeting in October, 1876, directing that the Finance Sub-Committee at their Meeting in January in each year should fix the charge for maintenance of Patients in the Asylum for the current year upon the basis of the average charge per head per week of each Patient during the then past year. In Accordance with this Resolution your Committee, on the 29th January last, on the recommendation of the Finance Sub-Committee, fixed the charge for such maintenance at 11*s.* 1*d.* per head per week, which has been the charge throughout the whole year.

Lunatics and Idiots chargeable to the County, Isle, and Borough, 31 Dec., 1876.

On the 26th February, 1877, the Clerk to the Visitors produced to your Committee the following return of Lunatics chargeable to Unions in the County, Isle, and Borough on the 31st December, 1876, compiled from Returns from Clerks to Boards of Guardians (see Statistics published at the end of the 19th Annual Report).

	In the Asylum.			In other Asylums.			In Work-houses.			With Friends.			Totals 1876.			Totals 1875.	Increase.	Decrease.
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	M. and F.		
County ...	66	61	127	1	...	1	10	12	22	17	32	49	94	105	199	189	10	...
Isle	57	63	120	...	...	...	14	18	32	6	9	15	77	90	167	156	11	...
Borough ..	27	33	60	...	...	...	6	4	10	7	12	19	40	49	89	79	10	...
	150	157	307	1	...	1	30	34	64	30	53	83	211	244	455	424	31	...

By the above table it will be seen that on the 31st December, 1876, there were 455 Lunatics

chargeable to Unions in the County, Isle, and Borough as against 424 at the same period in 1875; of these it will be found that the Insane in Workhouses and with friends were precisely similar in 1875 and 1876, viz. 147, and that the whole increase of 31 Lunatics has taken place in the numbers actually in the Asylum. On the 31st December, 1875, there were in Asylums 277, but on the corresponding day in 1876 there were 308, as shewn above.

Of the 31 additional Lunatics above-mentioned the County has 10, the Isle 11, and the Borough 10.

Calculations as to Quotas of Expense borne by the 3 Bodies and Patients in the Asylum, 31 Dec., 1876.

From the Annual Returns it is ascertained that out of 12 Unions in the County, Isle, and Borough, sending Patients to the Asylum only one (Caxton) has decreased since 1875, and that only by one Patient. Dividing the actual number of Patients in the Asylum on the 31st December, 1876, viz. 307, by the proportion of charge of keeping up the Asylum paid by each of the Three Bodies, the following would be the result:

The County	9-19ths	could send in	145;	they had only	127,	being	18	deficiency
The Isle	7-19ths	,,	113	,,	120	,,	7	in excess.
The Borough	3-19ths	,,	49	,,	60	,,	11	,,

Your Committee regret to report that the increase of Insanity, as stated above, has not abated during the past year, the number of Patients in the Asylum on the 31st December, 1876, having been 307 as against 313 on the 31st December, 1877.

ase of William Doncaster, an Idiot Child.

In November last, Dr. Bacon, the Medical Superintendent, called the attention of your Committee to the case of William Doncaster, a Patient, who had been sent to the Asylum from the Whittlesey Union, who was "An idiot child, aged 10, blind, helpless, epileptic, unable to speak, stand, or feed himself, and weighing only 3 stones."

Your Committee requested Dr. Bacon to write to the Board of Guardians of the Whittlesey Union, informing them that the case had been brought before the notice of your Committee, and that they were of opinion that the Union Workhouse was the most appropriate place for such a young and afflicted Patient, and to request that he be forthwith removed from the Asylum. This request has been complied with. Your Committee mention this case, and especially urge on the Guardians of the several Unions in the County, Isle, and Borough, as the Asylum is now so full of Adult Patients, not to send this class of Patients, who can be better provided for and treated in a Workhouse.

)eath of Joseph Scott, late gar-ener of Asylum recorded.

Your Committee regret to have to report the death of Joseph Scott, the Gardener of the Asylum, which took place on the 27th of July last, at the Lodge. Scott was appointed to his office on the 29th of December, 1864, on the decease of his father, Richard Scott, who was also gardener before him. Joseph Scott performed the duties of his office to the satisfaction of your Committee and the Medical Superintendent.

In consequence of the great alterations in the Asylum and additional buildings added thereto, since the last Fire Insurance Policies were effected, your Committee in January last had a complete revision thereof made, and all damage to the Buildings as they now exist will be covered by the Insurances now effected. Your Committee have also insured the two Boilers in use at the Asylum in "The Manchester Boiler Insurance Company, Limited," in the sum of £400 each.

Fire Insurance Policies on Asylum revised.

Following the directions of the Lunacy Acts, your Committee have to report that during the past year they have discharged two of the Male Attendants for drunkenness, viz. Samuel Littlechild on the 29th April, 1877, and Benjamin Harris on the 30th July, 1877.

Discharge of Attendants for Drunkenness.

As usual an appendix to this Report will be printed and will contain the Reports of the Commissioners in Lunacy on their Inspection of the Asylum on the 17th February, 1877, and of Mr. Rowe, the Asylum Architect, together with correspondence referred to in this Report.

OLIVER CLAUDE PELL,
Chairman.

THE ASYLUM, FULBOURN,
31*st December*, 1877.

APPENDIX

TO THE

TWENTIETH ANNUAL REPORT

OF THE

COMMITTEE OF VISITORS,

CONTAINING REPORTS THEREIN REFERRED TO.

CAMBRIDGE ASYLUM, FULBOURN,
February 17th, 1877.

Commissioners' Report, referred to at page 13.

All the Patients whose names are now on the books of the Asylum have been seen by us to-day. We have again to report an increase in the numbers, there being 305 now as against 285 at the visit last year. Of these, 150 are men and 155 women. In the Male Division there are 2 vacant beds and in the Female 10.

The weekly charge last year was at the high rate of 12*s.* 3*d.*, for the present Quarter it is reduced to 11*s.* 1*d.*

There have been the following changes amongst the Patients since the last visit:

	Male.	Female.	Total.
Admitted	53	43	96
Discharged	19	23	42
Died	13	20	33

Thirty-one recoveries are reported.

The Deaths resulted from the following causes:

Phthisis and other diseases of the Chest and Lungs 10, Diarrhœa 7, Diseases of the Brain 7, Old Age and Exhaustion 7, Asphyxia 1, Cancer 1.

Post-mortem Examinations were made in 18 cases, and upon 2 Female Patients Inquests were held. In one, a case of Acute Mania only 3 days in the Asylum, and not supposed to be Suicidal, the Patient was found suffocated by pieces of blanket which she had crammed into her mouth and throat. In the other the Patient was found dead in a single room, and her death was ascertained to have been caused by Disease of the Heart.

Erysipelas, which was noticed to have been prevalent at the last Visit, continued to attack the Female Patients for a short time afterwards. In July, August, and September, a severe form of Diarrhœa was epidemic in both divisions. As many as 24 Patients were effected, and 7 deaths were attributed to this disorder. These Diseases no doubt originate in overcrowding and imperfect Sanitary arrangements, and though by the Plans for the Extension of the Building, at an estimated cost of £13,000, these defects will be remedied, we are sorry to learn that the Building operations are proposed to be spread over a period of six years, and a sum of only £2000 is to be called for annually.

Besides the great inconvenience and disturbance which will necessarily be caused by spreading these

trifling Building operations over so long a period, the cost will probably be increased, and the grave defects above adverted to, and which no doubt affect the lives of the Patients, will remain unremedied.

We trust, therefore, that the Visitors will see fit to re-consider this matter and give orders for the completion of the building at the earliest possible period.

At present the additions to the Male Infirmary have alone been proceeded with and will shortly be finished.

The staff of Attendants consists of 11 of each sex, besides the two Head Attendants, and the recent changes amongst them do not appear to have been frequent. There is also a Night Attendant in each Division, who visits the Wards once every two hours; visits at such an interval do not, we think, provide for the proper supervision of those cases really requiring attention, nor is there any special arrangement for the care at night of Epileptic or Suicidal Patients. It would, no doubt, be difficult to secure this in the present state of the Asylum, but we hope that when the additions in progress are finished this matter will at once be attended to.

There was no real excitement amongst the Patients as we passed through the Wards, nor were complaints made to us of any unkind treatment. The Wards were clean, the bedding was in good order, except that on the Men's Side more

care should be taken in seeing that a blanket is placed beneath the Sheet, and the means for daily washing and the supply of combs, brushes, &c., sufficient. The personal condition of the Patients, as regards cleanliness and tidiness of them, was also satisfactory. Sunday suits are provided and the men have a change of linen twice a week. The Dinner to-day of meat pie, with carrots and beer, was good and the portions liberal.

From the returns furnished to us it appears that between 70 and 80 of each sex attend the Chapel service, and that 12 of the men and 15 of the women go to the Village Church on Sunday.

Walking parties go out beyond the Grounds on 3 days in the week. We desire strongly to recommend the planting of some trees, and the placing of seats at intervals, along the walk that now runs round a portion of the Asylum Grounds.

Weekly dances, attended by about 40 Males and 60 Women, are given.

The number employed are 106 Men and 115 Women. Twenty-five of the former work on the land and about the same number at different trades, and of the latter 20 are in the Laundry, 6 in the kitchen, and the remainder at housework and needlework.

The numbers last Registered under Medical Treatment are 9 Men and 10 Women.

There has been no restraint. One Man has been secluded on 10, and 3 Women on 6 occasions, chiefly on the ground of Epileptic excitement.

We visited the Cemetery Chapel and found it in a very unsatisfactory state. The walls are damp and the plaster in many places falling off. We hope it may at once be put into a proper condition.

There is still no Assistant Medical Officer in this Asylum, though in August last we find there were as many as 317 Patients resident. We again repeat our opinion, that an Asylum of this size should at no time be left without a Medical Officer, and we learn that this is not unfrequently the case for hours and occasionally for a whole day. In making this statement, we wish to observe that we do not attach any blame to Dr. Bacon. He cannot be expected to confine himself entirely to the house. In the event of any serious accident or emergency occurring in his temporary absence, such as choking, suicide, or sudden illness and death, no blame could fairly attach to him.

GREVILLE HOWARD,
JAMES WILKES,

Commissioners in Lunacy.

THE CHAPLAIN'S REPORT.

County Asylum,
26 *December*, 1877.

GENTLEMEN,

It becomes once more my duty to inform you that the appointed Services have been duly performed in the Chapel of this Asylum during the past year.

On one Sunday only, in September last, I was prevented by illness from officiating, and the Service was then performed by the Rev. R. Wilson, of Cambridge.

My Diary shews that I have visited the Patients on Wednesday afternoons with very few exceptions. The Burial Register shews that I have buried 33 Patients in the Cemetery during the year to this date.

The Chapel continues to be well attended on Sunday mornings, and I have reason to believe that many derive much pleasure and comfort from their attendance.

I am,
Gentlemen,
Your obedient servant,
W. S. PARISH,
Chaplain.

To the Committe of Visitors.

CAMBRIDGE,
31 *December*, 1877.

To the Visitors of the Cambridgeshire Asylum.

GENTLEMEN,

Mr. Rowe's Report, referred to on page 13.

I beg to report as to the following works during the past year:—

Male Side, Infirmary.—The New Infirmary has been completed, furnished and occupied.

Waterclosets.—Two sets of Waterclosets with Jenning's Urinals (of the best construction) have been erected.

Soiled Linen.—The building of a room has been commenced for the reception of soiled linen from the Wards before it is passed on to the Laundry.

Female Side.—A new Day Room for the Patients employed in the Laundry, a Day and Night Infirmary for the Sick and Aged, two sets of Waterclosets, and a Boundary Wall to the Laundry Yard, have been completed; a General Bath room, a portion of the Corridor connecting it with the Wards and Infirmary, and a Scullery with Waterclosets adjoining have been roofed in.

Hot Water Tank.—The cast-iron Tank in the roof, heated by Steam from the Engine Boiler,

proving too small for the supply of hot water required for the additional buildings, a new wrought-iron Tank containing a Steam Coil has been fixed in its place.

General Water Supply.—The large cast-iron Tank in the Tower holding 9000 gallons into which water is pumped from the Wells direct, shewed signs of weakness when full; it has been strengthened by a continuous girdle of rolled iron joists and additional tie rods.

The brickwork of the Tower has been tied together with iron bolts and dogs and the fissures pointed.

A line of pipes has been laid under ground to bring water from the Tank in the Tower to the Lodge, there being reason to suppose that the water in the existing well was in an impure state.

Laundry.—The iron Boilers becoming rusty and spoiling the Linen by iron-mould, copper boilers have been substituted for them and a new slab slate rinsing Cistern provided.

Repairs.—Considerable repairs to the buildings and fittings have been executed, as, and when, required.

Execution of Works.—The Hot Water Tank was made by Mr. J. I. Headly, of Cambridge; the Tank in the Tower was strengthened by Mr. A. D. Dawnay, of London; the Copper Pans in Laundry and a new Valve for the Rising Main from the Pumps were supplied by Messrs. Pontifex and

Wood, of London; the Slate Cistern was made by Mr. W. H. Jarrold, of Cambridge.

All the Buildings have been built, gas and water fittings fixed, and all the other repairs have been executed by the regular Asylum Staff and additional hired workmen in a substantial and satisfactory manner.

I have the honour to be,
Gentlemen,
Your obedient Servant,
R. REYNOLDS ROWE.

REPORT

OF THE

MEDICAL SUPERINTENDENT

FOR THE YEAR 1877

TO THE COMMITTEE OF VISITORS.

On the last day of the year 1877 there were 313 patients in this Asylum, viz., 145 males and 168 females, being an increase of five on the total on January 1st, 1877.

This increase in numbers has been more on the female side, and would have been greater had not the mortality been so great during the year.

The deaths have not been remarkable in their causes, and there has been no fatal accident nor suicide. Nine of the deaths were due to Phthisis, ten to other forms of chest disease, and nineteen to diseases of the nervous system.

Of the 48 who died, thirty-seven had only been in the Asylum two years, and of these 37 twelve

had been resident under a month and twelve had been in less than a year. This rather tends to illustrate the unfavourable nature of the cases admitted.

In only half the Admissions had the attack been the first or of less than three months' duration—two important points in relation to their curability.

During the autumn Erysipelas re-appeared in the wards, and proved fatal in two cases. Six women were attacked and three men, and diarrhœa also was prevalent on the male side.

A fractured patella, a fractured humerus, and a successful operation for strangulated hernia, all occurring on the male side, are the chief surgical incidents of the year.

I have this year, as last, to record the death of one of the staff, viz. Joseph Scott, the gardener, &c., who had lived on the estate for 13 years. He died in July, after several months' illness, having served the Asylum with great intelligence and fidelity, and was much respected. He left a widow and five childen, all of whom were soon after attacked by typhoid fever, which, unfortunately, proved fatal to the mother. Five out of the six were indebted to Addenbrooke's Hospital in Cambridge, for their treatment, and, most probably, their recovery.

On examination it was found that the water supplied to the lodge, in which they lived, was in a very foul state. It was derived from a well which proved to be partly filled with vegetable matter and impurities. To remedy this the water

was laid on from the main building, and the house, an isolated one, is now in a satisfactory state.

The statistical tables appended will be found to furnish the usual information as to recoveries, admissions, and so forth.

G. MACKENZIE BACON, M.A., M.D.

TABLE I.

Showing the Admissions, Re-admissions, Discharges, and Deaths during the year 1877.
